

Technical change to end brackets WEW 35/...

Dear Madam or Sir,

the below listed articles will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications are performed for reasons of product improvements.

1. Initial situation

Until now, all WEW 35/1 and WEW 35/2 end brackets were provided with an Ex approval. The Ex approval is only required for the use of the end brackets as holders for busbars in hazardous areas, see illustration.

2. Technical change

There are no technical changes to the products. For the WEW 35/1 and WEW 35/2 end bracket variants that do not have a V0 fire class, the Ex approval will be removed from the products. The background to this is a specification of the Ex approval for the busbars in order to increase the possible applicable temperature range of the end brackets in this application. This is only possible by dispensing with plastics with fire class V2 or worse.

3. Reason for change

Increase in the applicable temperature range of the end angles in the Ex certificate for use as holders for busbars.

4. Availability

As from now

5. Affected parts

1059000000 WEW 35/1
1162600000 WEW 35/1 SW
1227890000 WEW 35/1 GR
1061200000 WEW 35/2
1859200000 WEW 35/2 GR
1061210000 WEW 35/2 SW

6. Alternative parts

If the Ex approval (only relevant in applications with busbars) is still required, we offer the contour-matching, black end bracket with plastic of fire class V0:

1478990000 WEW 35/1 V0 GF SW

1479000000 WEW 35/2 V0 GF SW

We follow the advice of our customers and are constantly working on our products in order to improve them sustainably. We will implement these changes as smoothly as possible and without affecting delivery times and the functionality of the products.
