2. Technical changes

The disconnect element of the disconnect terminal block (LPA TR STI) has been redesigned to optimize functionality and reliability.

The new version features an updated design that specifically improves mechanical stability and contact performance.

To ensure clear identification, the color of the disconnect element has been changed (old: black / new: green).

The new version completely replaces the previous one. Functional interchangeability is maintained, while the modified color allows for clear identification of the disconnect element.

3. Schedule

With this letter, we inform you that the change will take effect in series production starting in **June 2026**.

A full inventory clearance has been carried out, so that only the new version (green disconnect element) will be delivered.
