

Terminal blocks

SNAP INTO the future with Klippon® Connect

SNAP IN 

Weidmüller 

SNAP INTO the future with Klippon® Connect

- Direct and tool-free wiring of flexible conductors without ferrules
- Simple release of the clamping point and a guaranteed and safe connection of the conductor
- Ready-to-robot and ready for the future as well

Get more information on our website:

Quick, Simple and Safe - just **SNAP IN**

The terminal blocks are delivered with preloaded spring. Stripped wires can be easily and safely inserted into the clamping point without further preparation.

The conductor is contacted in the clamping point with a clear, audible "click". The triggered clamping point is also signaled visually by a raised pusher.

By pressing the pusher, the conductor can be released quickly and easily at any time and the clamping point preloaded again.

Pioneers in industrial connectivity

Being a pioneer means reinventing yourself time and time again

More than 75 years of experience, billions of connections manufactured, and countless hours of development, make Weidmüller terminal blocks the safest and most powerful on the market.

1948

SAK-Series

First plastic isolated terminal block

1978

DSK-Series

First terminal block with direct plug in technology

1983

W-Series

First terminal block with self locking clamping yoke technology

1993

Z-Series

First terminal block from Weidmüller with tension clamp technology
