

Product discontinuation notice for the following IP67 products: SAI-AU Subbus Modules (Digital and Analogue Variants)

Dear Ladies and Gentlemen,

The items from the u-remote IP67 product family listed below have been discontinued, as previously communicated verbally, and are no longer available. Please share this Product Discontinuation Notice (PDN) with your employees and, if applicable, your customers.

1. General overview

Type of discontinuation: ☒ short-term action
normal (carried out after 6 months)

2. General information

As part of our continuous product maintenance and further development of our automation portfolio, we are required to respond to component obsolescence in the electronics market. The microcontroller we used in our SAI-AU Subbus portfolio has been discontinued. Compatible successor products are now type-tested and are, or will be, available at short notice.

We are constantly working with priority to restore a stable supply situation and would like to thank you expressly for your patience!

Due to the given compatibility after software update, Fit/Form/Function is retained.

Please refer to the corresponding AppNote to support the migration.

We will be happy to support you with questions on topics such as integration, etc... of the follow-up product.

3. Affected products

Discontinued items Material number / Description		Available alternative Material number / Short description	
1938690000	SAI-AU M12 SB 4AI	3096450000	SAI-AU M12 SB 4AI-V2
