

Ready to take your career to the next level?

We are looking for a **Production Planner** to join our team.

If you are passionate about manufacturing, planning, and process optimization, this could be the right opportunity for you.

Your responsibilities

- Plan and monitor production capacities, schedules, workflows, material availability, and equipment requirements.
- Coordinate order clarification and planning activities with internal stakeholders and cross-functional teams.
- Support the introduction of new products, product modifications, transfers, and process improvement initiatives.
- Collaborate with Production, Quality, Logistics, Purchasing, Maintenance, Engineering, and Development teams.
- Evaluate manufacturing feasibility, resource requirements, timelines, costs, and project risks.
- Contribute to the development of manufacturing concepts, documentation, equipment planning, and process optimization.
- Support the implementation of new technologies, machinery, and production solutions.
- Identify potential bottlenecks, deviations, and scheduling risks, and drive effective solutions.
- Ensure compliance with company standards, occupational safety regulations, and environmental requirements.

What we're looking for

- Strong understanding of industrial manufacturing and production processes.
- Experience in production planning, capacity planning, scheduling, and production control.
- Ability to analyze workflows, manufacturing documentation, and equipment requirements.
- Experience or interest in new product introductions, product changes, transfers, and continuous improvement projects.
- Excellent organizational, analytical, and problem-solving skills.
- SAP knowledge is considered an advantage.
- Good knowledge of MS Office applications (Excel, Outlook, PowerPoint).
- Good English communication skills; German is a plus.
- Previous experience in a similar position.
