Technical Change

Dear Ladies and Gentlemen,

Product changes serve the continuous product improvement. The articles listed below are supplied in a modified version. Please pass this product information on to your employees and, if necessary, to your customers. All changes are made for product improvement reasons.

1. Situation

At the moment the ZDU 2.5 and ZPE 2.5 products are manufactured in the established clamp carrier design.

2. Technical change

In the future, the affected products will be manufactured with new clamp carrier. Except for the ZDU 2.5 3AN variants, all affected products also have a new marking channel with lateral blades. This prevents the markers from slipping out.

The PE foot of the ZPE product variants will also be modified and will no longer be exposed, but enclosed on both sides by the plastic.

The PE terminals are still marbled green-yellow.

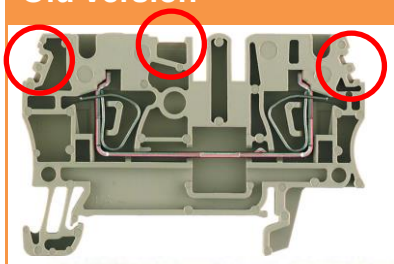

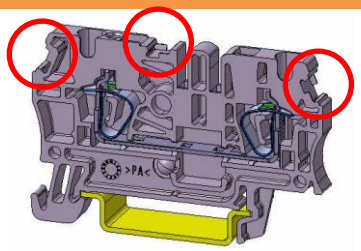

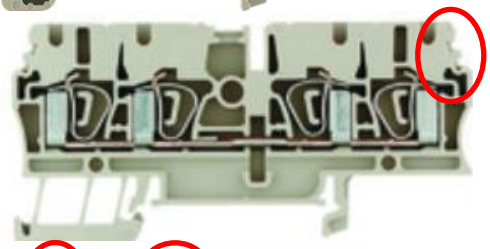

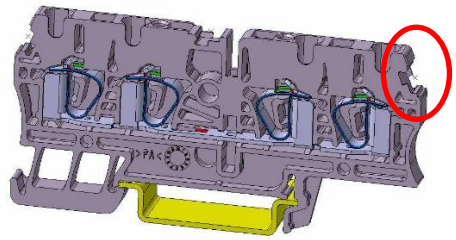

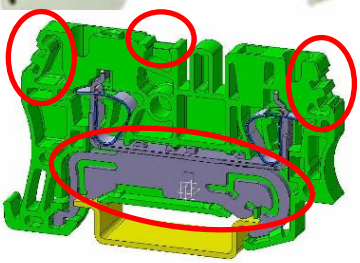

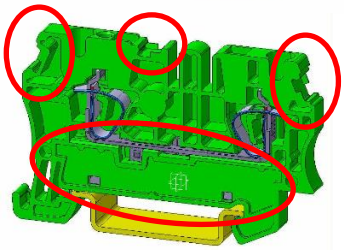

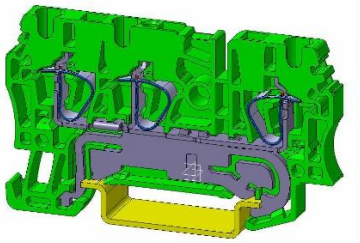

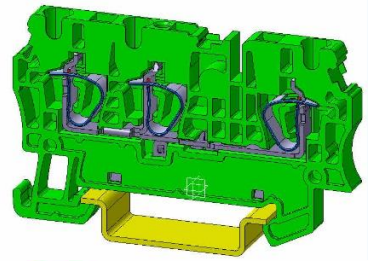

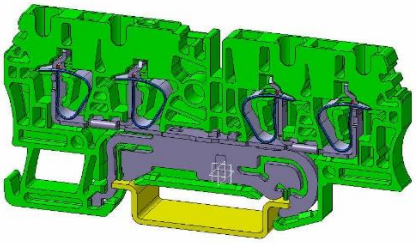

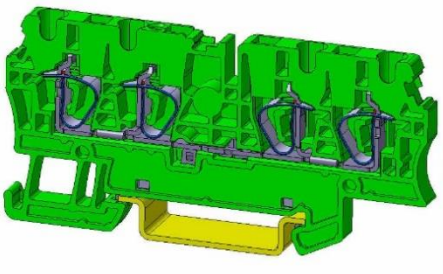

All certifications and approvals of the affected products will be renewed in this process.

3. Reason for the change

- Unification of products
- Better holding for markings

4. Availability

The change in the marker channels is expected to take place in Q3 2022. Changes in the PE foot will be implemented by Q3 2023.
Mixed stocks may also occur during the changeover period. Due to the changeover of the articles, it may happen that two different product levels are delivered within one delivery. However, the design is identical for each PU.

Old version	New version
	
	
	
	
	

Above color representation of ZPE variants not accurate. The products have a green-yellow marbling, as in the following illustration:
