Hand tools, automatic machines and printers

Weidmüller 

Perfectly coordinated

Weidmüller offers a wide range of services for our hand tools, automatic machines and printers:

Do you need personal support for commissioning and setting up your automatic machines or printers? We are happy to help – even on site.

You want your tools to always work perfectly and reliably?

Maintenance of hand tools, automatic machines and printers - a long service life of your equipment is important to us.

Despite all the care you take, has something been broken?

In case of service, we are happy to support you with spare parts and repairs.

Your machine shows a malfunction, even though a large order is about to be completed?

A pool of rental equipment is available for you to reduce downtime. And even internationally.

Do you have increased requirements for your (crimp) connections?

For your guaranteed safety, we offer calibrations and test certificates for many of our tools. In addition, we test your individual connection with our calibrated measuring equipment using the current standards. You send us your assembled conductors with the necessary information and receive a test report from us.

Weidmüller technical service

With Weidmüller you have a high-performance partner at your side who supports you in all phases of your work with optimally coordinated solutions for your workshop.

At product level, Weidmüller has been developing and producing professional tools to meet the highest demands for over 40 years. We always have one goal in mind: we want to make your work easier, optimise work processes and help to sustainably secure the productivity of your company.

Weidmüller supports you with a range of certification services:

| Certification when reordering | Recertification | Process monitoring |
|--|--|--|
| Prior to delivery, we arrange for your new tool to be certified by production-independent bodies and additional tests. Afterwards we guarantee the quality of our tool with a letter and seal. | Has your tool been in use for a long time and you want to make sure that it still meets all standards? Send it to our Service department and we will test it thoroughly. | Do you want to secure your process without having to send in your tools on a regular basis for recertification? Not a problem. All you have to do is crimp sample conductors and send these to us. We then check the crimping quality for you. |

100 % premium quality

- Premium products „Made in Germany“ for over 40 years
- Always up-to-date certifications and approvals according to all relevant standards
- Perfect interaction of tools and accessories e.g. crimping tool and wire-end ferrules from one source

Our goal

Electrical cabinets or electrical systems are usually only as good as the tools used by the employee. That's why everything fits together at Weidmüller. From terminal block assembly to the installation of sensitive electronic components - we have the right tool for all applications. This is how we would like to help you make your work easier and increase your profitability in the process.

On the right side with Weidmüller

As a German family-owned company, our claim is the highest quality, constant innovation and absolute reliability.

Thanks to state-of-the-art manufacturing processes, technical expertise and a passion for our products, we have been creating the basis for professional quality tools and labelling systems „Made in Germany“ for over 40 years.

We want to make work easier, optimise processes and help to increase the productivity of your workshop in the long term. That's why we place the highest value on quality, flexibility in form and function, sophisticated ergonomics and optimum interaction between our products and services.

Weidmüller – Your partner in Industrial Connectivity

As experienced experts we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signal and data. We are at home in their industries and markets and know the technological challenges of tomorrow. We are therefore continuously developing innovative, sustainable and useful solutions for their individual needs. Together we set standards in Industrial Connectivity.
