

Technical change to BEST

Dear Madam or Sir,

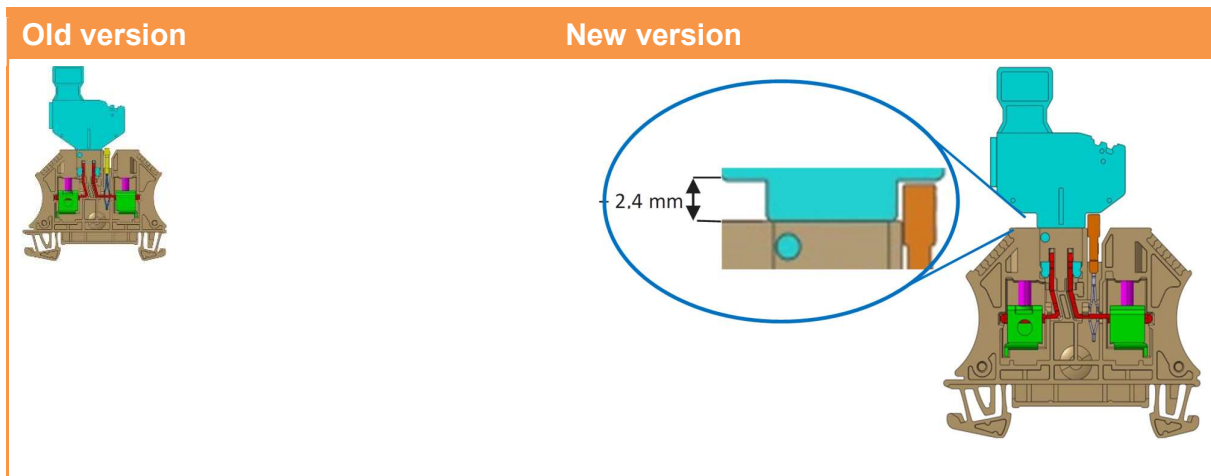

the below listed articles will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications are performed for reasons of product improvements.

1. Initial situation

The component holder BEST is used for fitting electronic components. It replaces the disconnect lever or fuse holder of disconnect terminals or fuse terminals.

2. Technical change

Height:	unmodified
Unique identification of the "new" BEST:	ingraving "2018"

3. Reason for change

The component holder BEST has been modified, as the pluggable cross connection for the A series is 2.4mm higher, due to the target to get only one pluggable cross connection ZQV...N for the A series & the W series.

4. Availability

The "new" version will be on stock from the end of October 2019 on. Please note that we do not scrap any stock of the old versions. For a certain space of time this can lead to the situation that one variant is still the "old" version meanwhile an other variant is already the "new" version which is shipped.

5. Affected parts

1833100000	BEST
1878570000	BEST/DRBR
1878560000	BEST/D

We are very sorry for all the inconveniences caused and doing everything to adjust this product change as smooth as possible without big influence on delivery times and general functions.
