Weidmüller

Conveying
From energy distribution to IIoT
The Conveyor technology requires a lot of data and signals to distribute the goods efficiently.

From centralized to decentralized control cabinet concepts Weidmüller offers the optimum customized solution. In the field of digitization in the Brown- and Greenfield, we offer appropriate pre-processing and provision of the recorded data up to the cloud. The easy connection to existing control systems is guaranteed by the open and flexible u-OS operating system. Thanks to Weidmüller PLC and the intralogistics function blocks an easy integration and commissioning is processable.

Your benefits:

- Decentralized modular system
- Function blocks
- Plug and Play
- Open and flexible softwareNodeRed, u-OS, Codesys
- Extensive hardware portfolio
- Customized engineering support

Extensive solutions for intralogistics

Our product solutions, technologies and services

Digitization:
Gateway, Switch, Router, EasyConnect

Decentralization:
FieldPower, Modular system, Field distributor, Customized control cabinet solutions

Connectivity:
Terminal blocks, SAI cables, Connectors, Cable assembly

Power Management:
Switch-mode power supplies, load monitoring Energy management, DC industry

Automation:
PLC, Digital IO, Visualization, Open operating system u-OS

Engineering:
Customized assembly: Cables, Terminal strips & housings, PLC function blocks, NodeRed blocks

Made in Germany | 11/2023
