

## Technical change to MTS 5

Dear Madam or Sir,

the products of SNAP IN PCB terminals MTS 5 will be changed after a transitional period.  
Please pass on this Product Change Notification (PCN) to your employees and, if applicable, to your customers.

### 1. General overview

Type of change: ☒ **short-term** (executed within the next 6 months)  
☐ **normal** (executed after 6 months)

#### Short-term action due to:

| <input type="checkbox"/> Short-term recall by supplier  | <input type="checkbox"/> Force majeure             |
| <input checked="" type="checkbox"/> Product improvement | <input type="checkbox"/> other                     |

#### Short-term action due to:

The products of the MTS 5 series are currently at the beginning of their production lifecycle. Therefore, the execution of the change is planned in the short term, even before larger inventories have been built up.

### 2. General information

We have been able to optimize the closure labels of the tube packaging so that we ensure safe transportation without any damage or loosening of products without additional foam material. The freed-up space allows to increase the number of products in one package. In this way, we reduce the packaging waste of our products in a resource-saving manner.

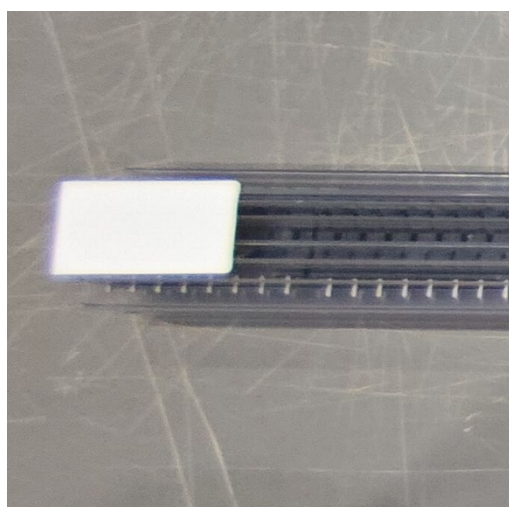

### 3. Change details

In the future, the pink foam will be removed on both sides of the plastic tube. Due to the freed-up space, additional products are inserted into the tube, depending on the number of poles (according to the table on page 2).

**Old version (with foam)**

**New version (without foam)**
