

Product Discontinuation for various directly labeled terminal blocks

Dear Sir or Madam,

the products listed below are intended to be discontinued and will no longer be available after a transitional period. Please pass on this product information to your employees and possibly to your customers. All of these product discontinuations have been made to support our continued commitment for improvement and ongoing product development.

1. Initial situation

Over the past years, the requirements and conditions within the target applications of our products have continuously evolved. This development has led to a decline in demand for specific products, making it increasingly challenging to continue production in an economically sustainable manner.

In light of these developments, we have decided to discontinue the manufacturing of the products listed below and hereby officially announce their phase-out.

Of course, we offer suitable successor products that meet current market demands and provide a future-proof alternative.

2. Schedule / Availability

The articles listed below will be discontinued on 30.04.2027.

3. List of affected articles / follow-up

All successor articles are identical products, the only difference is that they do not have markers.
