

Technical change to RSM and RSMS modules

Dear Madam or Sir,

The above listed articles will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications are performed for reasons of product improvements.

1. Initial situation

Articles on Section 5 were provided in the past with LP, LP2N and LP3R connectors. Furthermore they were delivered with Dekafix.

1456540000 (w/ LP and LP3R)

1449220000 (w/ LP and LP2N)

2. Technical change

Based on continuous improvement the LP, LP2N and LP3R connectors with Dekafix will be replaced by LL, LL2N and LL3R connectors with pad printing technology.

Furthermore, to fulfill with UL approvals, product label has been changed to include the UL logo with its file number (cTMus) and the appropriate UL rated values. (See exceptions on Section 5*)

Cancellation

LP3R 5.0x/90

Matting compatibility

LP2N 5.0x

Matting compatibility

LP 5.0x

Matting compatibility

Substitution

LL3R 5.0x/90

LL2N 5.0x/90

LL 5.0x/90

3. Reason for change

Obsolescence of LP, LP2N and LP3R connector range and addition of **UL-recognized** approvals (cTMus) on the label for these products, making each interface UL recognized.

4. Availability

Current products in stock still have old connectors. Since today new productions will be with new modifications detailed above. This will be reflected on its KKZ or compatibility indicator which will be increased. As time goes on, products with old compatibility codes will decrease until end of stock following a FIFO process.
