

## Technical change to RIM

Dear Madam or Sir,

the products listed below are subject to a product change and will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. This product change is the result of our ongoing commitment to continuously improve our products for you.

### 1. Initial situation

The LED modules (RIM modules) in D-SERIES with status indicator are equipped with green THT (through hole technology) LED's on the internal PCBA's (printed circuit board assembly).

### 2. Technical change

The LED's are changed from green THT LED's to green SMT (surface-mounted device) LED's equipped on the internal PCBA's. Therefore, the green LED colour could differ to the prior used LED's.

New version

### 3. Reason for change

New approvals (cURus and CSA) for these modules require this change.

### 4. Availability

The changeover will start in Q1 2022. We cannot avoid mixed deliveries.
