Technical change of AKZ 4 KRG

Dear Madam or Sir,

the below listed articles will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications are performed for reasons of product improvements.

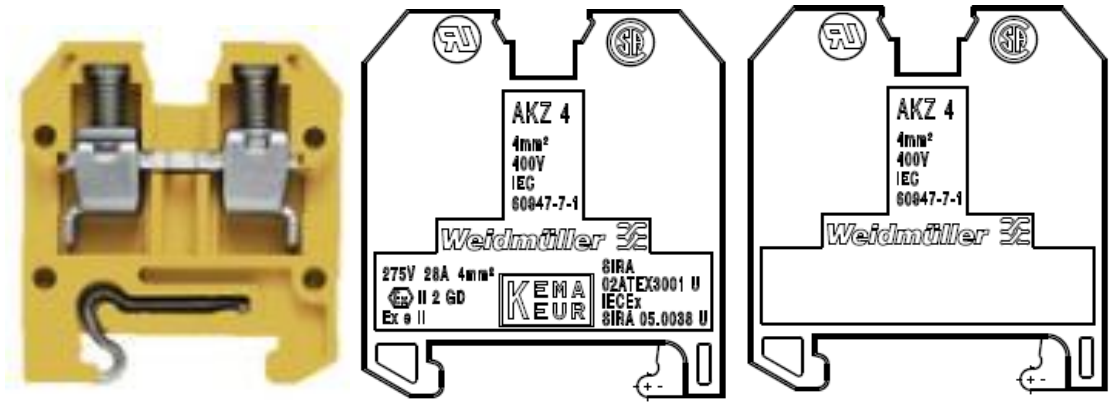

1. Initial situation

The affected article is a mini feed-through terminal of our SAK screw connection series. Within an ATEX certification of the notified body SIRA we decided to not extend the ATEX certification of this product. The Ex - marking will be removed from the product.

2. Technical change

The product itself, material and form fit function are not affected. Only the printed ATEX information will be deleted and the terminal without printed ATEX information cannot be used in ATEX application.

Old

New

3. Reason for change

Within the Brexit it is unclear how long certifications by SIRA are still valid. In addition, with the AKZ 4 WEMID, we already have a 1 to 1 alternative with a new valid EX-certification. That is the reason why we have decided not to extend the AKZ 4 KRG approval.

4. Availability

The AKZ 4 KRG without Ex-marking is available at Q1/2020.
The AKZ 4 WEMID with Ex-marking is already available.

5. Affected parts

The following parts are affected:

- 0294320000 AKZ 4 KRG
- 0445720000 AKZ CUN/KRG

We are very sorry for all the inconveniences caused and doing everything to adjust this product change as smooth as possible without big influence on delivery times and general functions.
