

Workplace Solutions

You want to optimise your work processes
We support you with the quality tools you need

**WORKPLACE
SOLUTIONS**

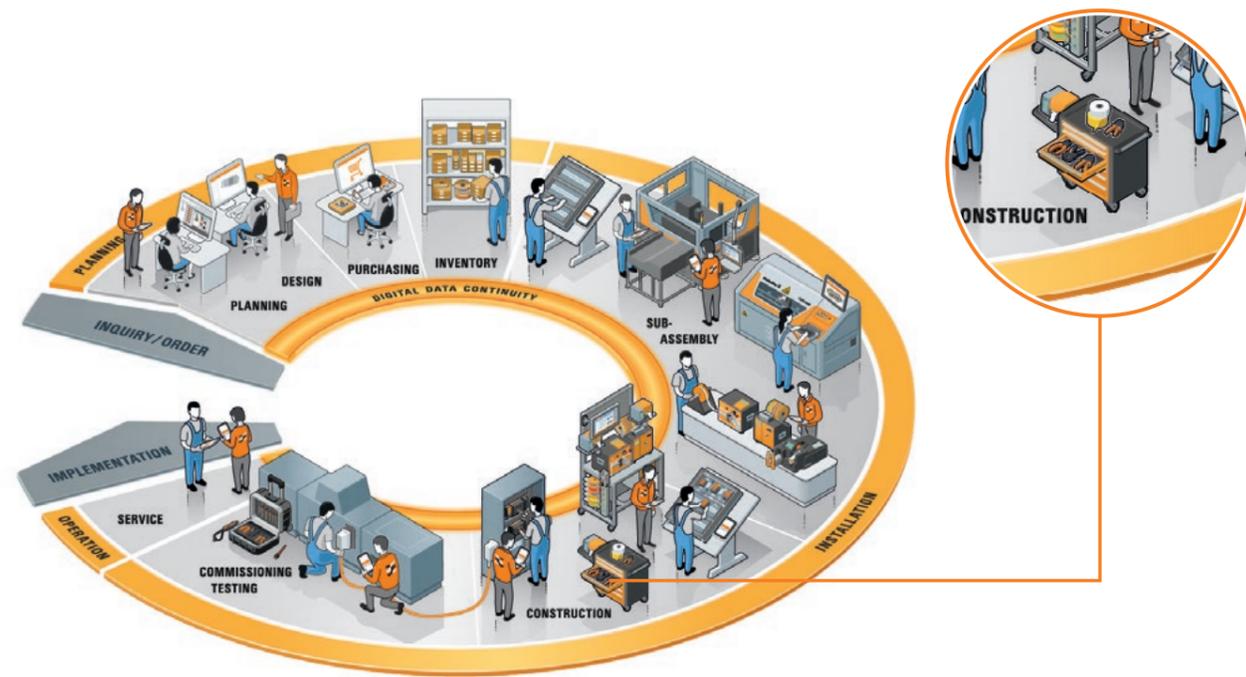

Weidmüller 

Practical for all your needs

The world of Weidmüller tools

With Weidmüller, you have a strong partner by your side to support you in all work phases with perfectly coordinated solutions for your workshop. Based on many years of practical experience in panel building, we offer a comprehensive portfolio to effectively speed up your processes and increase your quality.

When it comes to products, at Weidmüller we have been developing and manufacturing specialist tools to meet the most stringent requirements for over 40 years. When we develop new products, we always have one goal in mind: to make your job easier, to optimise workflows and to help protect the long-term productivity of your business. Products and tools from a single manufacturer that are designed with 100 % compatibility in mind form the foundations that allow you to achieve this.

With Weidmüller, you have a powerful partner at your side who supports you with optimally coordinated solutions for your workshop in all phases. Based on many years of practical experience in all aspects of control cabinet construction, we offer you a comprehensive portfolio with which you can effectively accelerate your processes and increase your quality.

Discover your optimisation potential now:
www.weidmueller.com/workplace

Just the right tool for your application

Mix and match products and tools from one and the same source

With Weidmüller's professional tools, you can do your work faster, better, and more precisely than ever before. Even demanding tasks are easy and fatigue-free – almost like have superpowers.

Strip it – don't rip it
 Precise stripping tools that give you an instant grip on any insulation.

Tighten it – don't slip
 Robust screwdrivers to handle any screw in the twinkling of an eye.

Cut it – don't squeeze it
 Professional cutting tools for demanding tasks indoors and outdoors

Crimp it – don't crush it
 Reliable crimping tools that let you connect wire-end ferrules and contacts in a flash.

Test it – don't be shocked
 Professional testing tools that guarantee, you never miss a fault.

Installation of terminals

Greater convenience. Greater safety.

Crimping

Crimping tool

The world's first adjustable grip width makes the PZ 6 ROTO ADJ a real pleasure to hold. The rotatable die allows the ferrules to be inserted from the front or side. Highest processing quality guaranteed with only one die from 0.14 to 6mm².

PZ 6 ROTO ADJ Order No. 2831380000

Stripping and Crimping machine

Robuster, hochflexibler und elektropneumatisch angetriebene Automat zum Absolieren und Crimpen in einem Arbeitsgang. Kein Werkzeugwechsel bei der Verarbeitung von verketteten Weidmüller Aderendhülsen von 0,5 bis 2,5 mm².

CRIMPFIX R VARIO Order No. 2580000000

Screwing

Electric screwdriver

An electric screwdriver for working without fatigue. Automatic torque control and a high level of repeat accuracy. To make your work easier, the torque settings for Weidmüller terminals are marked on the screwdriver.

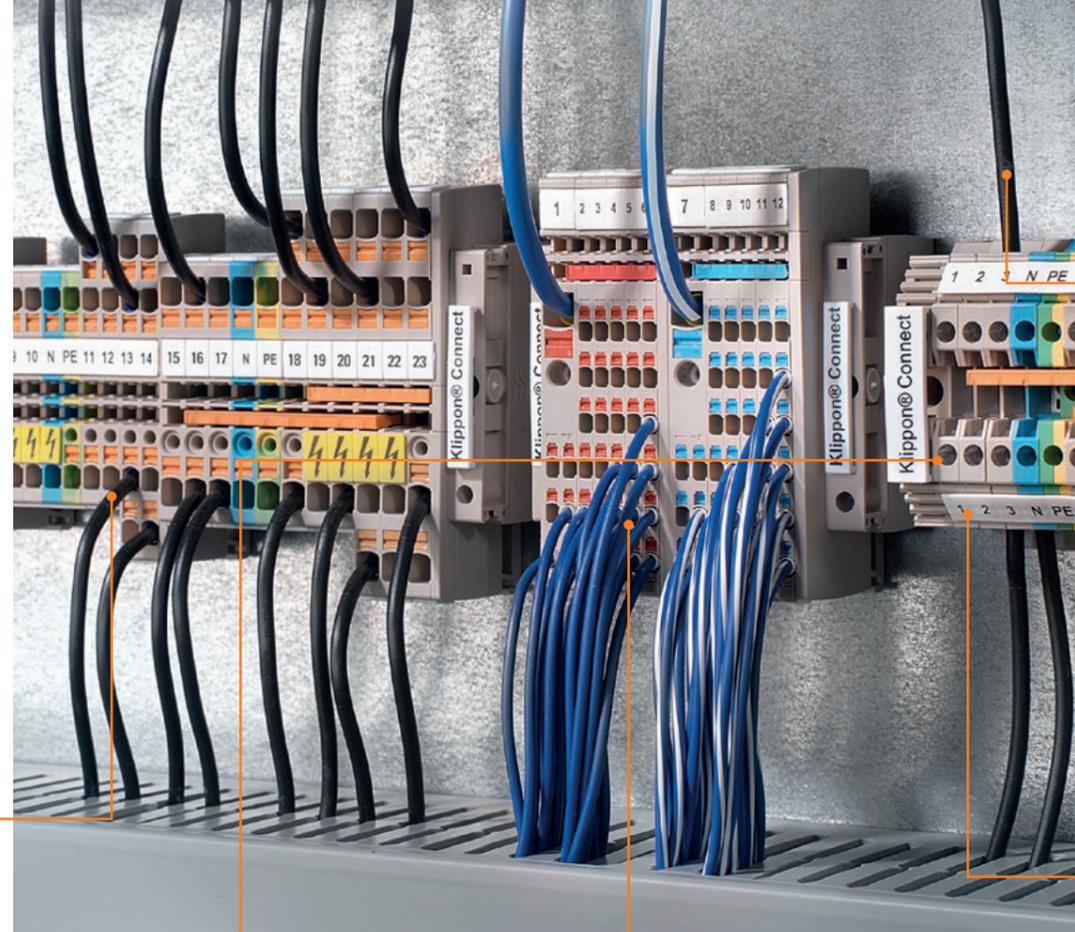

DMS 3 Set 1 Order No. 9007470000

SlimLine screwdriver

The appeal of the SlimLine system lies in its up to 33 % narrower blades. This means that you can operate deep lying fittings and tensionspring terminals that you cannot normally reach with standard VDE screwdrivers.

SDIS SL Order No. 2749580000

Cutting

Cutting tool

The specially shaped cutting formation of the KT 8 increases the cutting quality for small cross-sections, ensuring correct further processing.

KT 8 Order No. 9002650000

Marking

Marking system

As a marking tool, the PrintJet PRO stands out with its quality, resistant printing. The result is brilliant colours, thermal fixing, and wipe and scratchproof printing.

PrintJet CONNECT Order No. 2715590000

Stripping

Stripping tool

Exact stripping results from 0,08 to 10 mm² can be achieved with the self-adjusting stripax[®] stripping tool. The ideal complement: stripax[®] 16 from 6 to 16 mm² with shaping blade.

stripax[®] Order No. 9005000000

stripax[®] 16 Order No. 9005610000

Tool Tip

The problem:

When stripping individual conductors of a multi-core cable, there is a risk that the individual strands of the already stripped cable will be damaged by the tool.

The solution:

Thanks to the unique function of the switchable partial stripping on the stripax[®], the insulation residue remains on the conductor. Splicing or kinking is prevented. This facilitates further processing of the conductor.

Installation of relays

Fast and safe

Screwing

Electric screwdriver

An electric screwdriver for working without fatigue. Automatic torque control and a high level of repeat accuracy. To make your work easier, the torque settings for Weidmüller terminals are marked on the screwdriver.

DMS 3 Set 1 Order No. 9007470000

Screwdriver

Weidmüller screwdrivers fit comfortably in the hand and have a blade made of high-alloy chrome-vanadium-molybdenum steel and are hardened throughout, making them very long-lasting.

SD SET S2.5-5.5/PH1/2 Order No. 2749200000

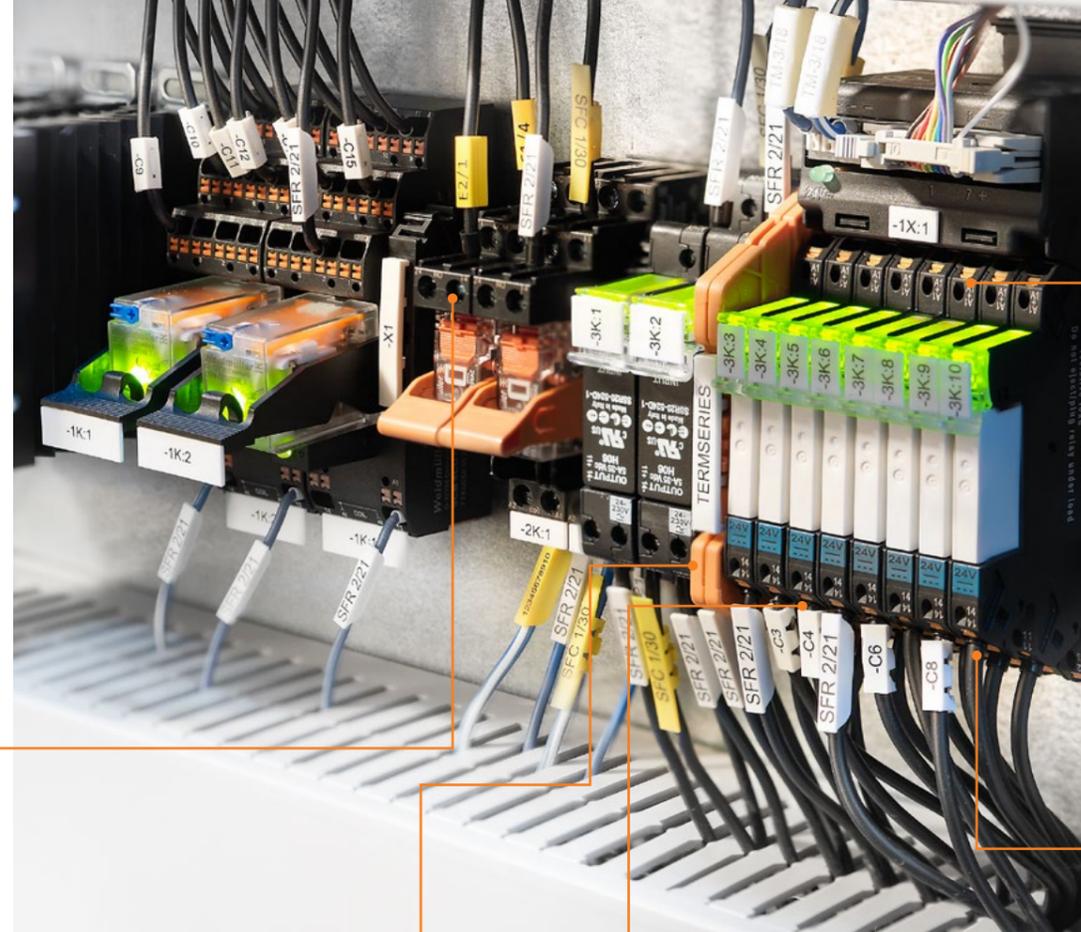

Cutting

Cutting tool

The special cutting geometry enables crush-free cutting, which guarantees correct further processing.

KT 14 Order No. 1157820000

Crimping

Crimping tool

The world's first adjustable handle width makes the PZ 6 ROTO ADJ a real pleasure to hold. The rotatable die allows the ferrules to be inserted from the front or the side. Highest processing quality guaranteed with only one die from 0.14 to 6 mm².

PZ 6 ROTO ADJ Order No. 2831380000

PZ 16 Order No. 9012600000

Tool Tip

The problem:

If wire-end ferrules and tools come from different suppliers, the recommendation of DIN EN 60352-2 is not followed. The result: wire-end ferrules can burst open or the conductor pull-out forces are too low. In this case, the user bears the responsibility.

The solution:

We offer you perfectly matched wire-end ferrules and tools. Consistently high processing quality is ensured and standard-compliant work as well as high process reliability are guaranteed.

Testing

Bipolar voltage tester

For more safety, you can use the two-pole voltage tester to measure not only voltage but also continuity, rotating field, resistance and frequency.

VT Digi Pro Order No. 9918870000

Stripping

Stripping tool

You can achieve precise stripping results ranging from 0.08 to 10 mm² with the stripax[®] self-adjusting stripping tool. The perfect addition: stripax[®] 16 6 to 16 mm², with a special blade form.

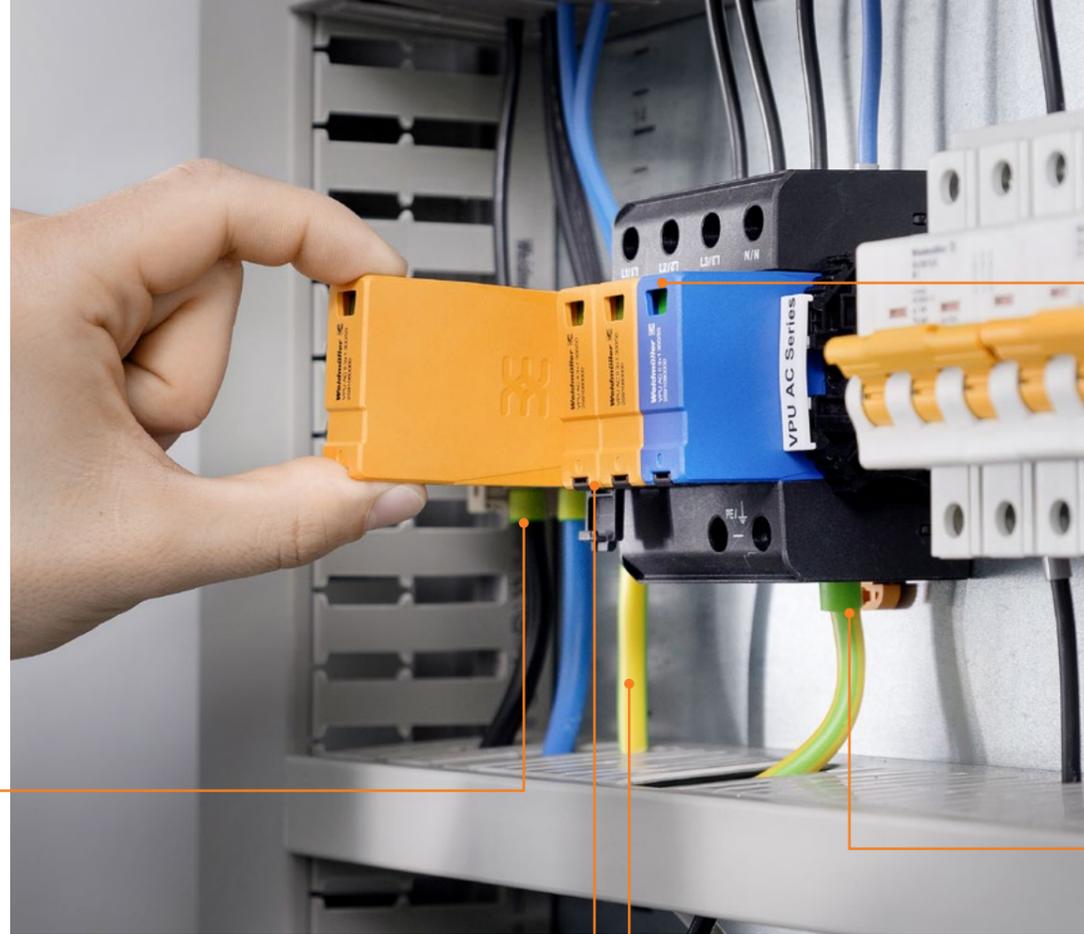

stripax[®] Order No. 9005000000

stripax[®] 16 Order No. 9005610000

Installation of lightning and surge protection

Maximum investment protection

Crimping

Crimping tool
Crimping without compromise with minimal manual force. Even large cross-sections can be easily processed with our PZ 16 (6 to 16mm²) and PZ 50 (25-50mm²).
PZ 16 Order No. 9012600000
PZ 50 Order No. 9006450000

Screwing

Screwdriver
Weidmüller screwdrivers are available in many different versions and sizes. Regardless of whether the head of the screw is slotted, cross-slotted PH / PZ or Torx, for example, our range includes the right screwdriver for the job.
SD SET S2.5-5.5/PH1/2 Order No. 2749200000
SD SET T10/15/20/25/30/40 TR Order No. 2749230000

Testing

Digital two-pole voltage tester
The display illumination, which switches on automatically in low light conditions, and the HOLD function ensure that the measurement result can be read optimally at all times.
VT Digi Pr Order No. 9918870000

Stripping

Stripping tool
The special shaped blades of the stripax 16 are ideal for stripping larger conductors up to 16 mm². The universal stripping tool AM 25 is suitable for even larger conductors.
stripax® 16 Order No. 9005610000
AM 25 Order No. 9001540000

Cutting

Cutting tool
The specially shaped cutting formation of the KT 22 increases the cutting quality for large cross-sections, ensuring correct further processing.
KT 22 Order No. 1157830000

Tool Tip

The problem:
The requirement for all cutting tools is: smooth, straight cut without deformation of the conductor.

The solution:
Professional cutting tools are characterised by one essential quality feature: The cutting edge shape corresponds to the respective application and is optimised accordingly. The manual forces required for cutting are then low.

Installation of terminal blocks and stud terminals

Easily process large cross-sections

Cutting

Cutting tool
With their special cutting edge shapes made of high-quality material, our KT tools enable crush-free cutting of round and flat ribbon cables.

KT 55 Order No. 9202060000

Sheath stripping

Sheath stripper
The advantage of the AM 25 and AM 35 sheathing strippers for PVC round cables: a rotatable knife for precise circular, lengthwise and spiral cuts on cables with diameters of up to 35 mm.

AM 25 Order No. 9001540000

AM 35 Order No. 9001080000

AM 16 Order No. 9204190000

Stripping

Stripping tool
The stripax® can be set to perform "partial stripping" in addition to the standard stripping setting. This leaves the insulation offcut on the conductor, preventing it from fanning out.

stripax® Order No. 9005000000

stripax® 16 Order No. 9005610000

Crimping tool

You can use the CTN series to crimp cable lugs ranging from 10 to 25 mm² with just one hand and in accordance with the DIN 46234 and DIN 46235 standards.

CTN 25 D 4 Order No. 9006220000

CTN 25 D 5 Order No. 9006230000

Crimping

Electro-hydraulic battery crimping tool

The EPG series offers a wide range of solutions for crimping solutions for crimping tubular cable lugs up to 400 mm².

EPG 45 Order No. 1500830000

EPG 60 Order No. 2453810000

APG 80 Order No. 2853270000

Measuring

Digital clamp-on measuring device
These measure direct and alternating currents without any disruption to the current flow.

Multimeter C 2608 Order No. 9427370000

Multimeter 1037 Order No. 9427460000

Screwing

Hexagon screwdriver
The hexagon screwdriver with a high-quality plastic T-handle is easy to use and facilitates your work efficiency. It is perfect for applying hexagon socket screws to terminals.

SDQ T HANDLE HEX 4 Order No. 2888290000

SDQ T HANDLE HEX 5 Order No. 2888300000

SDQ T HANDLE HEX 6 Order No. 2888310000

Installation of Heavy Duty Connectors

Greater precision for more reliable results

Cutting

Cutting tool
The specially shaped cutting formations of our KT tools always ensure a smooth and straight cut without wire deformation.
KT 45 R Order No. 9202040000

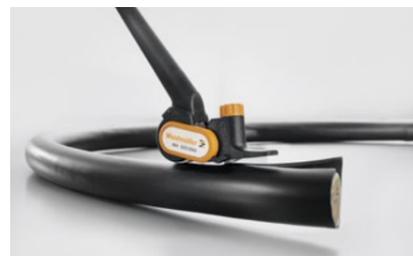

Assemble

Torque screwdriver
Exactly the right torque is essential when precise and effective work as well as high repeatability are required. The manual torque screwdriver guarantees safety and compliance with IP protection classes.
DMSI manuell 0,5 - 1,7 Order No. 9918390000
DMSI manuell 2,0 - 7,0 Order No. 9918400000

Sheath stripping

Stripping tool
Thanks to the integrated ratchet, you work with the AM-X like with a can opener. Fatigue-free and slip-proof. Cables with a diameter of 25 mm or more can be stripped with ease.
AM-X Order No. 2625720000

Punching

Hydraulic sheet metal punch
With the hydraulic sheet metal punch you can punch precisely fitting holes for the attachment of heavy-duty connectors.
IE-KO-HAT Order No. 1966810000
KOK 86x36 Order No. 9204850000

Crimping

Automated machines and Hand tools
Whether manual or automated, our crimping tools create perfect connections. Positioning aids on the hand tools ensure easy handling.
CTIN CM 1.6/2.5 Order No. 9205430000
CTX CM 1.6/2.5 Order No. 9018490000
CA Indent on request

Electro-hydraulic battery crimping tool
The EPG series offers a wide range of solutions for crimpingtubular cable lugs up to 400 mm2.
EPG 45 Order No. 1500830000
EPG 60 Order No. 2453810000

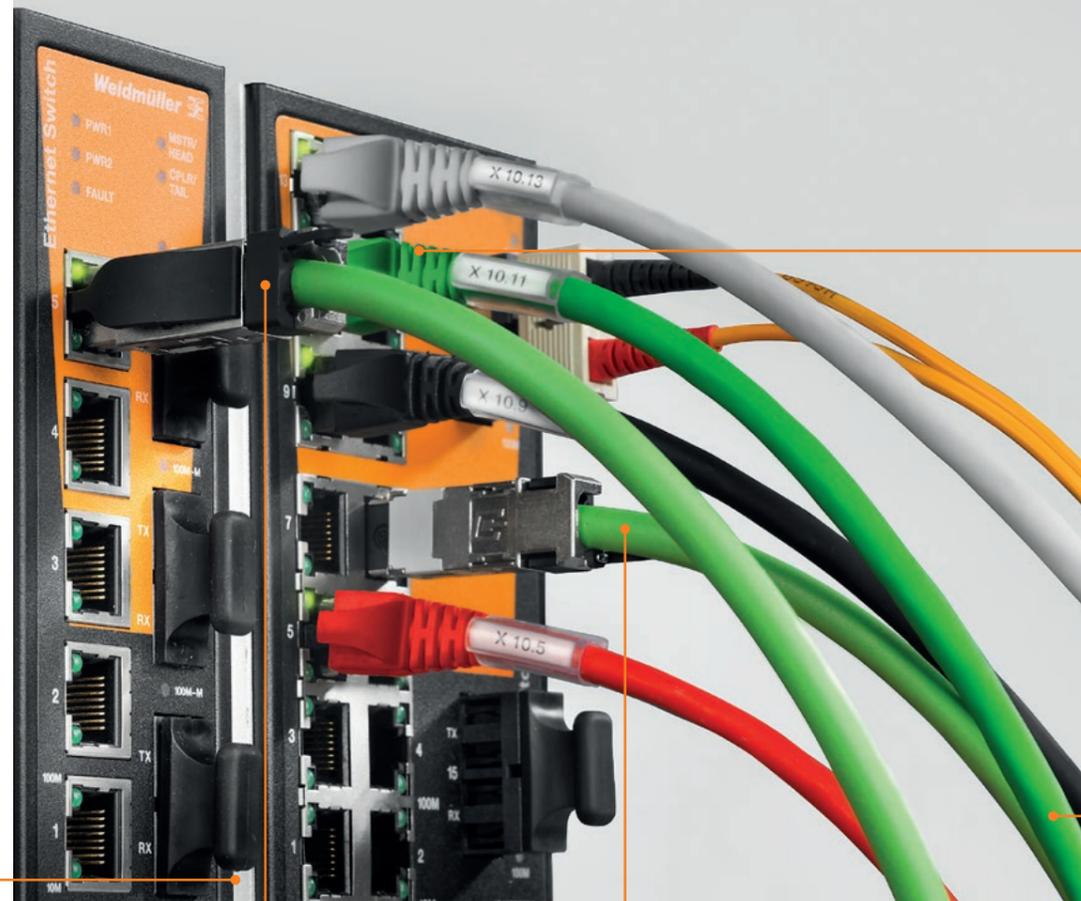

Tool Tip

The problem:
Manual processing of enclosure walls quickly leads to errors and deviations that jeopardise compliance with the IP protection classes.

The solution:
With the hydraulic sheet metal punch IE-KO-HAT, the sheet metal is not bent during punching and is automatically grained at the points intended for the hole. The heavy connector fits – the IP protection class is guaranteed.

Installation of Industrial Ethernet components

Save time. Cut costs.

Punching

Hydraulic sheet metal punch
 With the hydraulic sheet metal punch, you can punch accurately fitting holes for the attachment of Industrial Ethernet connections.
IE-KO-HAT Order No. 1966810000
 Use for HDC-Plug: **KOK 86x36** Order No. 9204850000
 Use for IE V01 Connector: **IE-KOK-V1** Order No. 1966780000
 Use for IE V04 Connector: **IE-KOK-V4** Order No. 1966790000
 Use for IE V05 Connector: **IE-KOK-V5** Order No. 9204790000
 Use for FrontCom Vario Single frame: **KOK 52 X 91** Order No. 2008410000

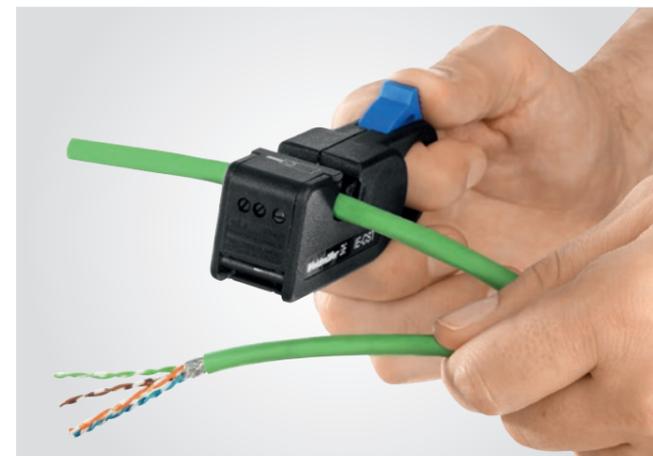

Crimping

Crimping/Pressing tool
 Tools for the assembly of 8-pole and 4-pole shielded connectors. Crimping of connectors, housings and cable shielding.
 8-pole RJ45: **TT 8 RS MP 8** Order No. 9202800000
 4-pole RJ45: **IE-CWZ-RJ45-TH-P** Order No. 2614210000

Sheath stripping

Stripping tool
 The stripping tool IE-CST enables a 2-stage stripping of stripping of Ethernet cables in one operation.
IE-CST Order No. 9204350000

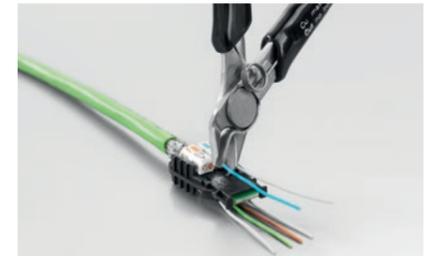

Testing

Continuity tester
 For more safety you can use the cable tester LAN USB to check for wire breaks, short circuits and wire interchanges.
LAN USB Tester Order No. 9205400000

Cutting

Cutting tool
 The electronic side cutter Super Cut holds the cut stranded wire firmly and thus avoids safety-relevant impurities.
SUPER CUT Order No. 9205150000

Tool Tip

The problem:
 Crimping connectors often requires a great deal of force, which puts a strain on the hands and can cost a lot of time.

The solution:
 To make your work easier and increase efficiency, the crimping tools meet the highest ergonomic standards. As a result, they fit perfectly in the hand and ensure a consistently high crimp quality with less effort.

Installation of Sensor Actuator Interfaces

A real knack for any situation

Stripping

Stripping tool
The self-adjusting stripping blades of the stripax® ensure precise cutting of the insulation insulation and avoid damage to the conductor.
stripax® Order No. 9005000000

Screwing

Screwing tool
The Screwty® is the ideal tool for screwing all common sensor and actuator cables. With the Screwty® you can reach even hard-to-reach round plug-in connections.
Screwty®-M8 Order No. 1900010000
Screwty®-M12 Order No. 1900000000

Cable gland tool
The infinitely adjustable FleCaFix allows screwing or loosening of cable glands without settling even in confined spaces and prevents deformation of the cable glands.
FleCaFix 11-24 Order No. 9015900000

Screwing

Torque screwdriver
Screwing the bonnet to the SAI distributor with the manual torque screwdrivers ensures you safety and compliance with the IP protection classes.
DMS manuell 0,5 - 1,7 Order No. 9918370000
Screwty®-M8-DM Order No. 1900011000
Screwty®-M12-DM Order No. 1900001000

Tool Tip

The problem:
The wrong torque endangers the process safety and the IP68 protection.

The solution:
With the Screwty® you are always on the safe side. The torque can be adjusted exactly to the respective requirement and the connectors are perfectly screwed. Your installation is therefore well protected. The Screwty® also fits connectors from other cases, the Screwty® also fits connectors from other suppliers.

Marking

Ladder markers
The SlimFix conductor marker is ideal for marking SAI conductors. You can still apply the markings afterwards without any problems.
SFC 2.5/12 Order No. 1062010000

Sheath stripping

Stripping tool
The intelligent Stripper 6-16 tool speeds up the stripping of SAI cables, without damaging the inner conductors.
Stripper 6-16 Order No. 9203110000

Installation of components for decentralised power distribution

Variable in every situation

Cutting

Cutting tool
 With their special cutting edge shapes made of high-quality material, our KT tools enable a crush-free cutting of round and ribbon cables.

Sheath stripping

Stripping tool
 The compact design in combination with the knife for round and lengthwise cuts simplifies stripping in the cable duct.

AM 16 Order No. 9204190000

Stripping tool
 The advantage of the AM 25 and AM 35 stripping tools for PVC round cables: the swivelling knife for precise round, longitudinal and spiral cuts for cables up to a diameter of 35 mm.

AM 25 Order No. 9001540000
AM 35 Order No. 9001080000

Stripping

Stripping tool
 The stripax® can be easily adjusted to insulation thicknesses - single conductors are stripped automatically.

stripax® Order No. 9005000000

Screwing

Torque screwdriver
 Only screwing with the correct torque ensures the IP protection of the FieldPower® Box.

DMS manuell 2,0 - 7,0 Order No. 9918380000
Slim Bit: WB IK SL PZ2 Order No. 2433240000

Screwdrivers
 With the Weidmüller screwdrivers you can operate the contact unit so that the ladder is firmly locked in place by means of the cutting-clamping technique.

SDS 0,5x3,0x80 Order No. 2749330000
SDS 0,6x3,5x100 Order No. 2749340000

Testing

Voltage testers
 The unique design and high functionality of Weidmüller's two-pole voltage testers enable you to work optimally on your application.

VT Digi Pro Order No. 9918870000
VT Combi Pro Order No. 9918860000

Tool Tip

The problem:
 Sometimes you have to measure in places that are difficult to access or see, where you cannot see and read the display directly.

The solution:
 With the HOLD function, the VT Digi Pro offers the possibility of retaining the measured values in the display by pressing a button in order to be able to read them even after the measurement.

Installation of enclosures

Perfect protection in all areas

Punching

Hydraulic sheet metal punch

With the hydraulic sheet metal punch, holes are punched with millimetre precision holes for the installation of metric and PG screw connections.

IE-KO-HAT Order No. 1966810000

KOS-M 16 Order No. 9204880000

Screwing

Torque screwdriver

The DMSI manual ensures a tight and secure screw connection of gland plate and enclosure.

The enclosure is tight and IP protection is ensured.

DMSI manuell 0,5 - 1,7: Order No. 9918390000

DMSI manuell 2,0 - 7,0: Order No. 991840000

Cable gland tool

By continuously adjusting different spanner widths, the FleCaFix enables screwing and unscrewing without having to set it down in the meantime.

FleCaFix 11-24 Order No. 9015900000

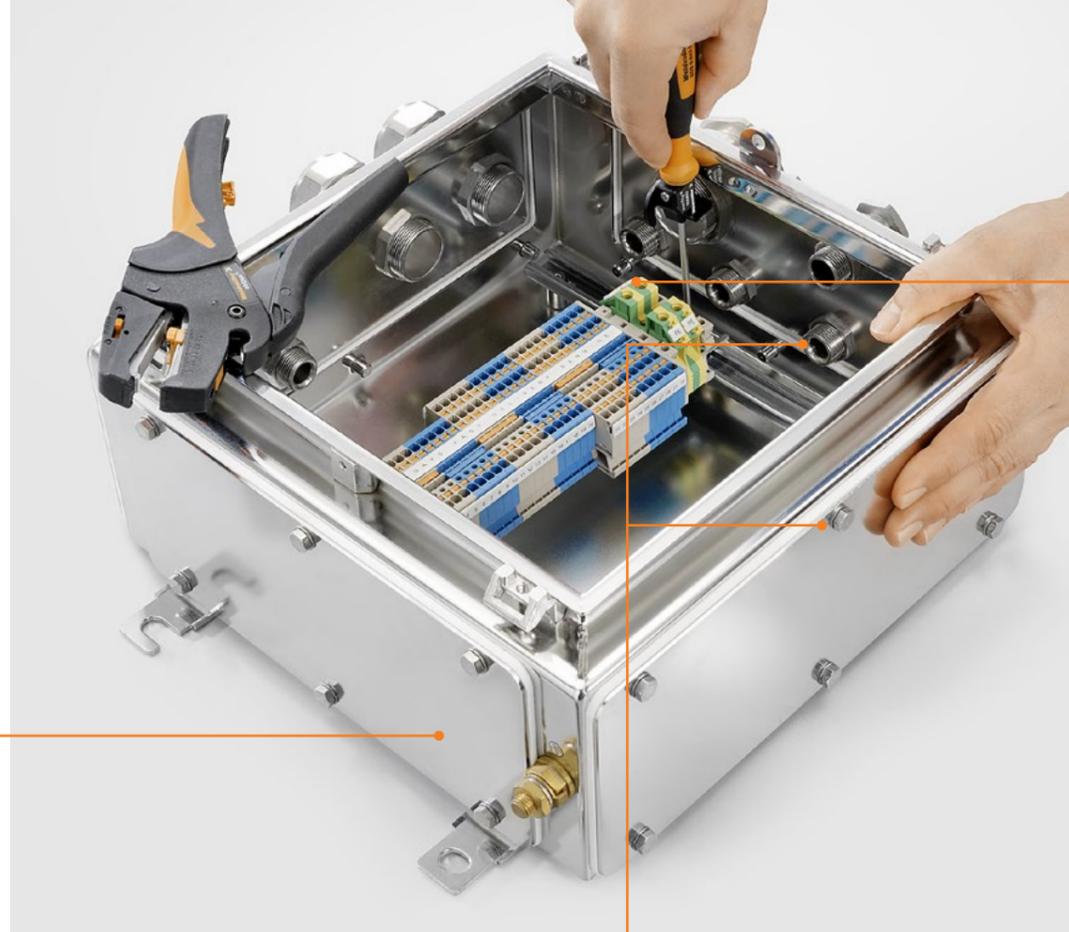

FleCaFix 24-36 Order No. 9015980000

Hexagon socket spanner

The hexagonal socket spanner with soft-finish handle ensures comfortable screwing and optimum handling thanks to its ergonomically perfect handle design.

SD SK 10x125 Best.-Nr. 2898950000

Cutting – Stripping – Crimping

Cutting, stripping and crimping tool
The stripax® plus 2.5 combines the 3 functions cutting, stripping and crimping in one tool.
stripax® plus 2,5 Order No. 9020000000

Tool Tip

The problem:

During wire processing, the user needs stripping, cutting and crimping tools in most cases. In addition, there is the difficulty of pushing required wire-end ferrules exactly onto the conductor, especially when wearing gloves.

The solution:

The stripax® plus 2.5 offers all functions in one: cutting, stripping and crimping from 0.5 to 2.5 mm. The automatic feeding of the linked ferrules eliminates the need to search for and push the ferrules onto the conductor. In addition, costs can be saved and space and weight in the tool case can be reduced.

Installation of PCB and electronic components

Optimum processing of the smallest conductors

Stripping

Stripping tool

With the M-D-Stripax, even the smallest conductors up to 1 mm² can be stripped precisely. Interchangeable blades with integrated cable guides cover a wide range of applications.

M-D-STRIPAX Order No. 9001280000

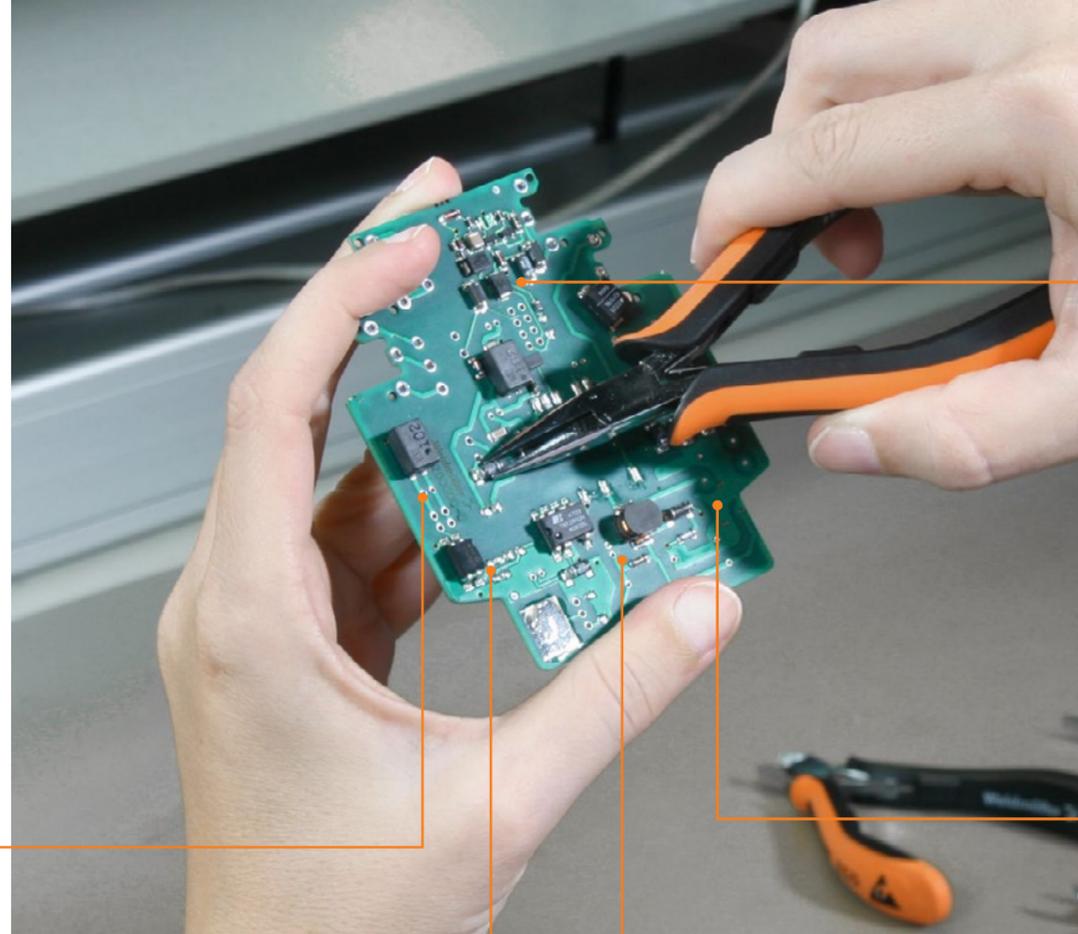

Crimping

Crimping tool

The world's first adjustable handle width makes the PZ 6 ROTO ADJ a real pleasure to hold. The rotatable die allows the ferrules to be inserted from the front or the side. Highest processing quality guaranteed with only one die from 0.14 to 6mm².

PZ 6 ROTO ADJ Order No. 2831380000

Pliers

ESD pliers

The materials of the handles of the ESD pliers contain additives that have a very low conductivity and safely dissipate the resulting charges. Working with ESD pliers is the only way to guarantee that sensitive electronics are not destroyed.

KOF SET ESD Order No. 9205210000

Tool Tip

The problem:

The transfer or discharge of electrostatic charge can cause considerable damage. Potentials of less than 100 volts are sufficient for damage to sensitive components.

The solution:

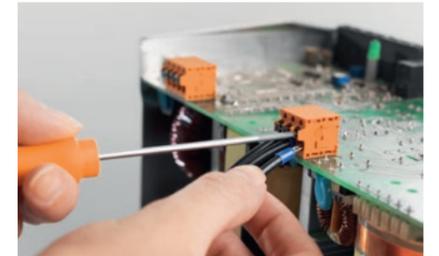

Weidmüller ESD pliers are designed for safe, precise use when working on sensitive electronics. The special handle material prevents electrostatic charges.

Screwing

Torque screwdriver

With this tool you always work in the right torque range. This guarantees safe, gas-tight clamping, no mechanical destruction of the clamping yoke and a voltage drop well below the required limits.

DMSI manuell 0,5 - 1,7 Order No. 9918390000

Testing

Voltage tester

Check a system or corresponding system components for proper functioning. Weidmüller voltage testers are available with digital or LED display.

Digi-Check Pro Order No. 9918870000

Combi-Check Pro Order No. 1279330000

Installing POF connectors

The versatile solution for quickly installing polymer optical fibre (POF)

Cutting

Cutting tool

The Kevlar shears feature a special tool shape and a ground, serrated cutting edge which makes them excellent for cutting reinforced fibres.

Kevlar-Schere Order No. 1208910000

Stripping

Cutting and stripping tool

The duplex multi-stripax® POF tool has two-in-one functionality. It quickly strips the outer sheathing and the inner conductor of POF-Cables.

multi-stripax® POF Order No. 1208880000

AIE multi-stripax® POF Order No. 1212770000

Crimping

Stripping, crimping and cutting tool

The process of assembling SC-RJ connectors is normally quite complex. The HTX-IE-POF multi-tool, however, is able to cut the fibres precisely to the ferrule. This speeds up the work flow, since there is no longer a need for polishing after the cut.

Crimp connection: **HTX-IE-POF** Order No. 1208870000

Reconnectable screw connection: **HTX-IE-POF-QA** Order No. 2602860000

Tool set IE-POF Order No. 1208930000

Checking

PROFINET POF repeater and Media converter with diagnostic function

FreeCon Active tests the transmission of Ethernet data in real time over the entire line path. If tolerances are exceeded, an alarm is sent to the higher-level control system.

Repeater: **IE-CDR-V14MSCPOF/VAPM-C II** Order No. 2455360000

Media converter: **IE-CDM-V14MRJSCP/VAPM-C II** Order No. 2588270000

Plugging

Industrial Ethernet fibre-optic connectors

Weidmüller offers a comprehensive line of plug-in connectors for transmitting data and signals that boasts all of the advantages of our STEADYTEC®-technology.

Crimp connection:

IE-PS-V14M-2SC-POF Order No. 2568260000

IE-PS-SCRJ1-POF Order No. 1206720000

Screw connection reconnectable:

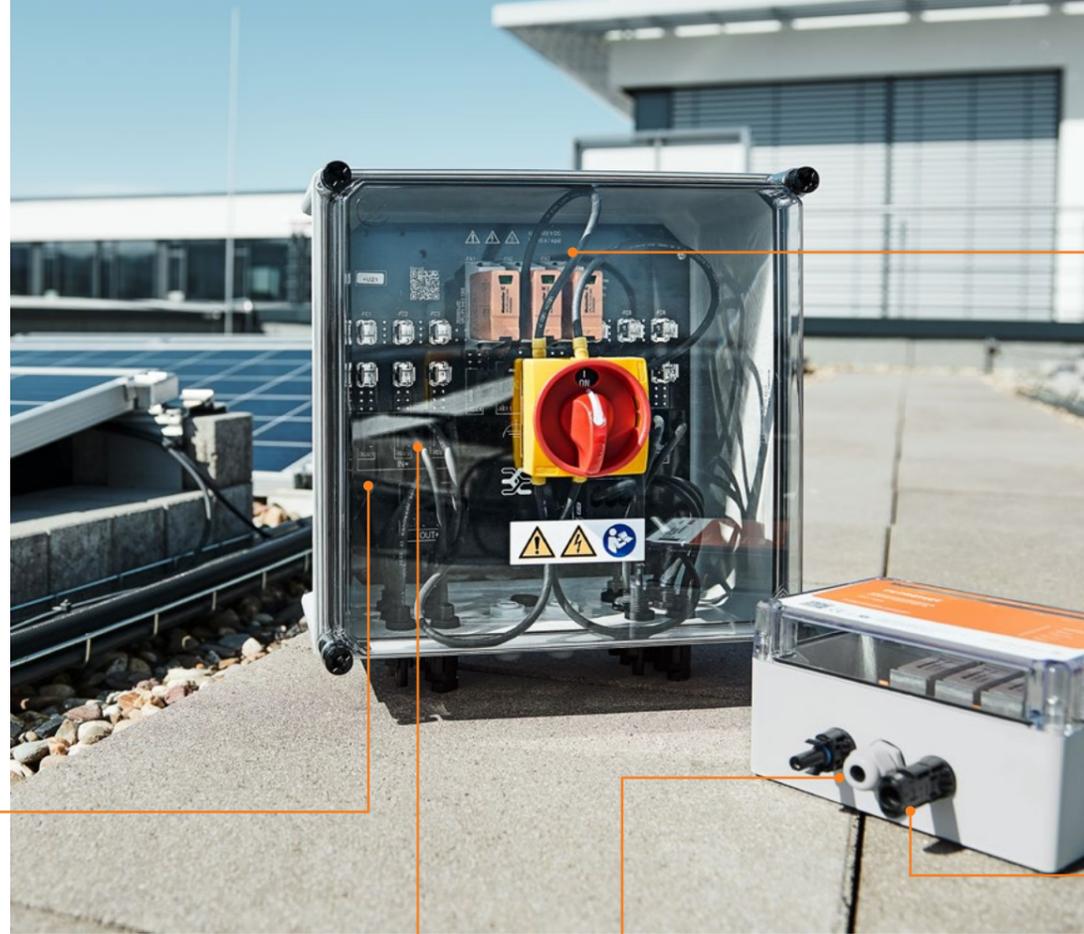

IE-PS-V14M-2SC-POF-QA Order No. 2568260000

IE-PS-SCRJ1-POF-QA Order No. 2564950000

Installation of photovoltaic junction boxes

Universal and fast

Cutting

Cutting tool
The specially shaped cutting formation of the KT 8 increases the cutting quality for small cross-sections, ensuring correct further processing.
KT 8 Order No. 9002650000

Stripping

Cutting and stripping tool
The multi-stripax® PV is the first practical multi-functional tool for cutting and stripping solar cables.
multi-stripax® PV Order No. 1190490000
AIE Multi-Stripax® PV Order No. 1204280000

Plugging

Photovoltaic connectors
The WM4 photovoltaic connectors have been approved in compliance with the latest TÜV standard DIN EN 50521. They combine 4 mm² and 6 mm² conductors in a single crimp contact and can withstand a 35 A nominal current load.
Buchsengehäuse, 100er-Beutel Order No. 1530690000
Buchsenkontakt, 100er-Beutel Order No. 1530670000
Stiftgehäuse, 100er-Beutel Order No. 1530700000
Stiftkontakt, 100er-Beutel Order No. 1530680000

Tool Tip

The problem:
Various coordinated components are required for the processing of solar cables. This means complex and cost-intensive work processes.

The solution:
With our PV sticks, crimping is no longer necessary. They are sorted and ready to hand in the plastic case with transparent lid. The multi-stripax PV ensures perfect stripping results. The set is rounded off by a tool belt so that it is always ready to hand.
PV SET PV-STICK Order No. 1459490000

Crimping

Crimping tool
The CTF PV WM4 is perfect for crimping when using our WM4 photovoltaic connector and compatible plug.
CTF PV WM4 Order No. 1222870000

Processing

Multi-Tool
The multi-tool is a multi-functional tool for working with PV photovoltaic connectors and photovoltaic junction boxes.
Multi-Tool PV Order No. 2771530000

Installation of charging box

Charge for the change

Sheath stripping

Sheath stripper
The advantage of the AM 25 and AM 35 sheathing strippers for PVC round cables: a rotatable knife for precise circular, lengthwise and spiral cuts on cables with diameters of up to 35 mm.

- AM 25** Order No. 9001540000
- AM 35** Order No. 9001080000
- AM 16** Order No. 9204190000

Stripping

Stripping tool
The stripax® can be set to perform "partial stripping" in addition to the standard stripping setting. This leaves the insulation offset on the conductor, preventing it from fanning out.

- stripax®** Order No. 9005000000
- stripax® 16** Order No. 9005610000

Crimping

Crimping tool
Crimping without compromise with minimal manual force. Even large cross-sections can be easily processed with our PZ 16 (6 to 16mm²) and PZ 50 (25-50mm²).
PZ 16 Order No. 9012600000

Screwing

Torque screwdrivers
Weidmüller torque wrenches are ergonomically designed to ensure fatigue-free working in all assembly directions. They also feature automatic torque limitation and high repeat accuracy.
DMS PRO Order No. 1479120000

Cutting

Cutting tool
The specially shaped cutting formation of the KT 8 and the KT 22 increases the cutting quality, which ensures correct further processing.
KT 8 Order No. 9002650000
KT 22 Order No. 1157830000

Tool Tip

The problem:
When processing the cable, make sure that the cut is clean, right-angled and, above all, free from crushing.

The solution:
According to the different connection types, cables and wires must be prepared precisely. The quality of the cutting process is therefore crucial.

Weidmüller Service

A reliable partner even after your purchase

Weidmüller offers a wide range of services for our hand tools, automatic machines and printers:

Do you need personal support for commissioning and setting up your automatic machines or printers?
We are happy to help – even on site.

You want your tools to always work perfectly and reliably? Maintenance of hand tools, automatic machines and printers - a long service life of your equipment is important to us.

Despite all the care you take, has something been broken?
In case of service, we are happy to support you with spare parts and repairs.

Your machine shows a malfunction, even though a large order is about to be completed?
A pool of rental equipment is available for you to reduce downtime. And even internationally.

Do you have increased requirements for your (crimp) connections?
For your guaranteed safety, we offer calibrations and test certificates for many of our tools.
In addition, we test your individual connection with our calibrated measuring equipment using the current standards. You send us your assembled conductors with the necessary information and receive a test report from us.

Certification when reordering

Prior to delivery, we arrange for your new tool to be certified by production-independent bodies and additional tests. Afterwards we guarantee the quality of our tool with a letter and seal.

Recertification

Has your tool been in use for a long time and you want to make sure that it still meets all standards? Send it to our Service department and we will test it thoroughly.

Process monitoring

Do you want to secure your process without having to send in your tools on a regular basis for recertification? Not a problem. All you have to do is crimp sample conductors and send these to us. We then check the crimping quality for you.

Wire end ferrules, contacts

- Guaranteed process reliability in conjunction with Weidmüller tools and automatic machines
- Fulfilment of all international standards
- High extraction forces set quality standards
- Quality „Made in Germany“ for various Nominal conductor cross-sections
