Technical change to CANopen/DeviceNet cord sets and cables

Dear Madam or Sir,

the products listed below are subject to a product change and will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications mentioned have been made to support our ongoing commitment to continual improvement and ongoing product development.

1. Initial situation

All CANopen/DeviceNet cables and M12 assemblies listed below are currently supplied with a black raw cable. The cable sheath is PVC or PUR depending on the version.

2. Technical change

The color of the cable jacket changes from black to purple.

The technical specifications of the cable and the finished article remain identical!
Only the color of the cable sheath changes.

3. Reason for change

Currently, the previously used cables cannot be procured in sufficient quantities in the short term.

The raw cable with violet cable sheath is better available on the market and thus improves the availability of the items listed below.

4. Availability

In the articles listed below, the cable with a purple cable sheath will be used in the short term in all further production orders.
Due to stock levels of the remaining cable, mixed deliveries may occur.
The black as well as the violet cable are to be used equally without restriction.

5. Affected parts

All length variants of the following article numbers are affected:

Article Number	Article Description	Material Cable Jacket
1058630000	SAIH-CD-2X0.34/2X0.22-PUR	PUR
