

## Changelog of Weidmüller u-link VPN Client Software

### General upgrade Information:

1. We recommend updating the Client, which will fasten up the connection and reduce error rate
2. It is strongly recommended to install the u-link Client as Administrator
3. Please uninstall the previous version of the client on your PC before installing this new client version

### Version 3.0.8

Release date: December 2, 2025

#### **Updates (related to previous version 2.0.263):**

- Redesigned user interface for improved usability and clarity
- Added support for profiles, enabling the use of multiple u-link Activation Codes within the same client
- Introduced the new WWH3 protocol for connecting the client to the u-link servers (ensure that wwh2-we.aw-cp.de is reachable from your network!)
- Changed runtime requirement from Microsoft .NET Framework 4.8 to .NET 8. As a result, Windows 7 and Windows 8 are no longer supported; we recommend upgrading to a current, supported version of Windows to ensure security and compatibility.
- Fixed a bug where VPN routes were not correctly removed when closing the client

### Version 2.0.263

Release date: June 16, 2025

#### **Updates (related to previous version 2.0.246):**

- In the event of local routing conflicts, the route via the u-link network is entered with a higher priority
- Update of SSCEP and OpenSSL
- Signing of all DLL files contained in the .exe file

### Version 2.0.246

Release date: April 08, 2024

#### **Updates (related to previous version 2.0.245):**

- Update OpenVPN to version 2.5.10
- Updated TAP adapter to version 9.27

### Version 2.0.245

Release date: March 20, 2024

#### **Updates (related to previous version 2.0.230):**

- Improved compatibility with other 3rd Party OpenVPN Clients from eWon, MBConnect and OpenVPN Connect.
- Client tries to restore TAP adapter names after driver update
- Update OpenVPN to version 2.5.8
- Windows 11 Support
- Change support webpage to <https://support.weidmueller.com>
- Added used Open-Source Licences

### Version 2.0.230

Release date: February 24, 2022

#### **Updates (related to previous version 2.0.225):**

- Updated TAP adapter to version 9.24

- Introduced link at Log/Support tab leading to text file containing open-source licenses
- Added vpn3-we.aw-cp.de and vpn3-ne.aw-cp.de as required vpn servers at required connectivity info
- Setup and client will ignore “Talk2m-eCatcher” TAP adapter and therefore is compatible with the current Talk2M eCatcher client Version 6.7.9 from eWon.

**Version 2.0.225****Release date: January 07, 2022****Updates (related to previous version 2.0.194):**

- Added autostart-option for headless mode
- Update to OpenVPN 2.4.11
- Bug fixed that entered several routes to the same network via different gateways
- Routes are deleted when VPN connection is disconnected
- Password protection for OpenVPN management interface

**Version 2.0.194****Release date: March 16, 2020****Updates (related to previous version 2.0.129):**

- Support SCEP V3
- Update to OpenVPN 2.4.7
  - OpenVPN 2.4.7 and following versions do not work on Windows XP. Therefore, the u-link VPN Client also does not work on Windows XP. Due to no support of this operating system, we recommend updating to a secure and supported version of Windows!
- New service to set routes at the PC, which is more error-resistant
- Update to .net 4.6
- ERROR correction:
  - Freeze after starting and stopping of VPN connections
  - Wrong status during connection

**Version 2.0.129****Release date: July 16, 2018****Updates (related to previous version 2.0.36):**

- Improved compatibility to other OpenVPN clients
- Improved user handling: Background of Account information text boxes changed to grey
- Update to OpenVPN 2.3.18
- Using new u-link Servers for WWH and VPN connection. Details can be found in one of these documents:
