

Product change notification

DRL

This article uses an exemption named in Annex III of the RoHS Directive 2011/65/EU "8b - Cadmium and cadmium compounds in electrical contacts", which could only be valid until 21.07.2021, depending on the product category. Please check whether you can use this article depending on the place of marketing and the product category concerned

In Annex III of the RoHS 2011/65/EU, the RoHS Directive specifies exemptions to the initial substance restrictions and limit values. In general, RoHS exemptions are always granted for a limited period of time and are subject to different phase-out dates depending on the respective application or product category. One of these exemptions "8b - Cadmium and cadmium compounds in electrical contacts" is applicable to the products listed below.

The industry can apply for an extension of the exemption to continue using the exemptions. However, as no such requests have been made, this exemption will expire on 21 July 2021 in the worst case and on 21 July 2024 in the best case, depending on the category of end product used. After expiration of the exemption, these products will no longer be EU RoHS compliant. Please check the use of these products in your applications. In the following list you will find comparable products without exemption which can be used without limitation in relation to EU RoHS.

Visit our online catalogue for more information

The miniature power relays of the D-SERIES DRL are available from 24 mm width. They have wear-resistant contact material for reliable switching of inductive loads. The product quality stays the same with the new contact material AgSnO2.
