

## Technical change to Aluminum Klippon K Enclosure (Instruction)

Dear Madam or Sir,

the products listed below are subject to a product change and will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications mentioned have been made to support our ongoing commitment to continual improvement and ongoing product development.

### 1. Initial situation

Instead of the printed operating instructions that are included as standard, we will be displaying a QR code in future. This can be found on the label on the outer packaging of the enclosures.

### 2. Technical change

The QR code refers to the online catalogue in the respective national language. The latest documents can always be downloaded here (in the Downloads section). You can also see the matching accessories for the respective product, as well as the approval documents.

Sample QR Code Klippon Enclosure:

### 3. Reason for change

We are thus pursuing the environmental aspect of having to print and dispatch less paper!

With the QR Code you have access to the current download information, worldwide.

### 4. Availability

The changeover will be seamless, as no technical changes will be made to the respective enclosure, or the technical properties will change as a result.

## 5. Affected parts
