

Easily migrate HMI solutions to web technology Modern touch panels with web HMI

Our innovative web-enabled visualisation solution PROCON-WEB makes it easy to implement your HMI solution. In combination with the robust u-view web panels, we offer you the perfect solution from a single source.

Weidmüller's specialists will support you in migrating your applications to a future-proof and secure system. Benefit from our engineering support from professional consultants.

Your benefits at a glance

- Flexible HMI solutions compatible with control systems from different manufacturers
- Attractive combination of hardware and software solution
- Simple implementation of your UI/UX supported by our experts

Powerful visualisation hardware and flexibly scalable web HMI software solution perfectly combined

PROCON-WEB

- **Flexible controls with style guide:** Fast realisation of your individual operating concept
- **Configuring instead of programming:** Simple engineering via the designer tool, without web and programming knowledge
- **High scalability:** From simple HMI applications on embedded devices to cross-machine SCADA solutions
- **Simple control connection:** Drivers for OPC/UA, Allen-Bradley, Codesys and Modbus

u-view Advanced Touchpanels

- **Robust:** Perfectly suited for industrial environments thanks to robust industrial housing with IP66 protection rating
- **Intuitive:** Thanks to modern multi-touch technology, operation is just as easy as on mobile devices.
- **High-performance hardware:** Quad Core processor with 4 GB DDR4 RAM and 16 GB eMMC memory
- **Different display sizes:** 7', 10.1', 15.6' and 21.5'
