

## Technical change to printing on PushPull Power contact inserts

Dear Madam or Sir,

the products listed below are subject to a product change and will be supplied in a modified revision. Please pass this product information on to your employees and, if needed, to your customers. All modifications mentioned have been made to support our ongoing commitment to continual improvement and ongoing product development.

### 1. Initial situation

All articles mentioned below have a printing of the contact designation in white color.  
The numbering counts from position 1 - 5.

### 2. Technical change

The printing of the PushPull Power contact inserts is now provided with a color assignment.  
In addition, position 5, which is mapped with the FE stranded wire, is also designated as FE.

**The technical specifications of the connectors remain identical!**  
Only the printing is changed.

Initial version:

Changed version:

### 3. Reason for change

The printing with the color assignment, as well as the concrete designation of the FE position simplifies the installation of the connector at the customer's site.

### 4. Availability

From now on, the new printing will be used on all further production orders for the above-mentioned connectors. Due to stock levels of connectors with previous printing, mixed deliveries may occur. Both variants can be used equally without restrictions.

## 5. Affected parts

2493480000	IE-BSS-VAPM-24V
2465440000	IE-PS-VAPM-5P-2.5
2682090000	IE-PS-VAPM-5P-2.5-50

## 6. Data

PCN-number: PCN-PB47-20221012-00-A  
date of publishing: 12<sup>nd</sup> October 2022  
duration of validity: until further notice  
revision number: 00

We hope that the changes will benefit your business and will not affect you in any significant way and apologise in case of any inconvenience caused. Please rest assured that we will do everything possible to achieve this product change as smoothly as possible with minimum or no business disruption.
